### Booking policy

#### IRF Events

Event bookings submitted less than 48 hours before an IRF Geneva event cannot be guaranteed unless you receive a confirmation from IRF Geneva. Event bookings cannot be cancelled due to administrative issue with international refunding. However IRF Geneva welcomes substitute event delegates up till the start of the event. We would appreciate receiving details upfront so that badges can be prepared.

#### IRF publications

IRF publications will be shipped (economy mode) upon receipt of payment. Cancellations received within 48 hours of the placed order will receive a full refund less 25% administrative costs. If an IRF publication should be out of stock, you will receive an order cancellation notification and you will receive a full refund.

#### IRF Webinars and e-learning

A paid webinar booking entitles you to access the webinar recordings. The right of access to a Webinar is non-transferable. Webinar bookings are not refunded. IRF retains the right to postpone a webinar to a later date should the circumstances dictate. If so, your booking for the original webinar will remain valid. IRF does not hold any responsibility for the inability to access a webinar due to hardware or software issues with your IT equipment.

#### Currency

When making payments on the IRF Geneva website, your credit card will be debited for the amount and currency mentioned on the payment form. All costs related to currency conversion are carried by the buyer.

#### Applicable law

## **Security**

Security measures are in place to protect the information you send us against loss, misuse and alteration. These security measures ensure the privacy of information while it is transmitted through the Internet and stored on our servers.

When you access the payment area of the IRF Geneva site, your transaction across the Internet is protected by high-strength 128 bit SSL encryption, provided you are using Mozilla Firefox, Opera or Microsoft Internet Explorer 5.0+. You will notice your web-browser "padlock" (bottom left or right edge of screen) is turned on before data entry occurs, this ensures that data transmission is totally private. If you are using an older web browser, the strength of encryption will be lower, usually 40 bit SSL. It is strongly recommended that all users of this site upgrade their browser to versions that support 128 bit SSL encryption.

No financial information is stored on IRF Geneva servers. This includes but is not limited to credit card numbers, expiry dates and CVN numbers. The information submitted is used once only for the purpose of the transaction, then destroyed on completion of the transaction. If the transaction cannot be completed immediately the information is discarded and the information will need to be resubmitted for the next attempt.

In addition IRF Geneva's servers are housed in secure facilities with access restricted to authorized personnel.
